OBJECTIVE

Junior PHP Developer.

SKILLS

PHP (MVC, OOP)

- have focus on OO-approach, usually don't mix Model and Controller responsibilities, still working on understanding DI

Yii

- bootstaping, scaffolding, RBAC and migrations(in scope of pet-project)

SQL (SQLite, MySQL)

- differ JOIN from UNION, dived into JOINing, aggregation, subqueries;

HTML, CSS, JavaScript

- know what's the difference between responsive layout and adaptive design; has experience with flexbox feature from CSS3 and grid layout for a bit

Git

- used a lot while working on pet-projects, worked on getting atomic commit with explanatory commits; still need experience in branching

REGEXP

- know what "greedy regexp" means and can use backreference to groups

Addition tools

- use Linux as home OS so feeling comfortable with console
- currently using SublimeText as IDE with plugins connected(xdebug, linter, docBlock) - but can use Netbeans too

WORK EXPERIENCE

Albero

2014 — 2015

CRM for full-cycle door manufacture

Initiated a developing and integration of CRM for cooperation of production and sale departments of manufacture which adapted to cycle "order-measure-production-mount". After being deployed CRM saved a significant amount of money and time(wasted previously due to lack of control).

Link

<https://github.com/vipaction/albero>

Technical request

- Registration of customers and their orders, full-cycle order stage data
- Authorization and restriction of access by user group
- Calculation of door model, getting list with detail's sizes and door's drawing
- Integration with calendar for action planning

Got skills

- own implementation of MVC
 - handling requirements
 - designing DB structure
 - using Git
 - responsive design(for door overview rendering)
-

Biketouring

2016

Tourist's blog

It's a platform for writing and placing posts about tours, travels and announces of future trips with features of comment, rate and share posts.

Link

https://github.com/vipaction/blog_yii2

Technical request

- Write and place posts about trip with abilities to comment and rate posts
- dedicated administration module
- RBAC and OAuth
- Integration with social networks

Skills

- Experience with Yii framework
- DB migrations
- Role based access control
- Scaffolding for better productivity

SUMMARY

I consider my strong sides are systematic approach to process and taking responsibility in case of making decisions. I would prefer working in team because it leads for increasing productivity(and knowledge sharing as well). As a team-member I'm patient and adaptive (got experience in long-day tourists travels)
